Zero loss of lives
no injuries or damages caused by fire and gas

Product Training

AutroSafe

AutroSafe is our high-end fire detection system for large and complex installations.

Operator Training

E-learning   116-AS4_OP_D
This fully digital course is designed to build knowledge and skills required for the operation and maintenance of AutroSafe 4 systems effectively. The course covers essential topics such as system architecture, maintenance and system components. *The course does not constitute a product certification.*

Accreditation: Achievement Badge

Target group: System operators

Topics:

- *System presentation & system components*
- *Maintenance: Loop diagnostics tool*
- *Panel operation, detector replacement*

Duration: 4 hours

Price per person: 12,000 NOK/1,200 USD

Installer Training

E-learning   116-AS4_IN_D

This fully digital course teaches you how to effectively and easily install AutroSafe4 system and understand its most commonly used components. Tailor-made for your needs, you can choose the industrial focus within the course.

Accreditation: Achievement Badge

Target group: System installers

Topics:

- *System presentation*
- *Installation*
- *Loop diagnostics tool*

Duration: 4 hours

Price per person: 2,500 NOK/ 250 USD

Certification

The AutroSafe 4 Certification happens in two stages:

> 1) Digital Certification preparation
> 2) In-person Certification course

1) <u>Digital Certification preparation</u>

⇨ The fully digital preparation course teaches you how to install and operate an AutroSafe 4 system, as well as how to do minor configuration changes. **Please note: Completion of the digital modules on our e-learning platform BEFORE THE in-person training is MANDATORY. They are a prerequisite to the in-person training. <u>Participants who have not completed the e-learning are subject to be refused access to the in-person training</u>.**

Topics:

- *System presentation*
- *Installation*
- *Loop diagnostics tool*
- *Basic configuration: change detector sensitivity, add/remove loop unit*
- *Panel operation, detector replacement*

2) <u>In-person Certification course</u>

The 2.5 day in-person Certification Course covers Installation, Configuration, Commissioning, and Operation of an AutroSafe 4 System, and Basic Knowledge of Fire Detection Terms and Principles. The certificate will be issued digitally upon completion of the course and is valid for 2 years.

Topics:

- *Commissioning*
- *Configuration: stand-alone system + network system*
- *System operation & maintenance*

Accreditation: Certificate
Target group: Service engineers, Project engineers
Duration of Certification Preparation (e-learning): ca. 4 hours
Duration of in-person Certification: 2 days (4 hours digital, 2 days in-person)

Price per person: 28,000 NOK/2,800 USD

Recertification

Easily re-new your AutroSafe 4 certification via our digital recertification course.

E-learning   116_AS4_ R_D_ENG (English); 116_AS4_ R_D_NO (Norwegian)

Accreditation: Certificate

Target group: Service engineers, Project engineers

Topics:

- *AutroGuard detectors*

- *Re-certification exam*

Duration: 1 hour

Price per person: 6,250 NOK/625 USD

AutroPrime

For small-to-medium sized installations, AutroPrime brings simplicity, quality, and extensive functionality in one integrated system, providing safety and economy in a complete package.

AutroPrime Virtual Certification

This course provides a thorough understanding of the AutroPrime interactive fire detection system. The virtual Instructor-Led course covers the installation, configuration, commissioning, operation and maintenance of an AutroPrime system. In addition, the course covers basics on fire detection terms and principles.

The certificate will be issued digitally upon completion of the course and is valid for 2 years.
Accreditation: Certificate

Target group: Service engineers, Project engineers

Topics:

- *System presentation*
- *Installation*
- *Commissioning*
- *Configuration*
- *System operation & maintenance*

Duration: 1.5 day

Price per person: 9,500 NOK/950 USD

Recertification

Easily re-new your AutroPrime certification via our digital re-certification course.

E-Learning   116-AP_R_D_ENG (English); 116_AP_R_D_NO (Norwegian)

Accreditation: Certificate

Duration: 1 hour

Target group: Service engineers, Project engineers

Topics:
- *AutroGuard detectors*
- *Recertification exam*

Price per person: 4,000 NOK/400 USD

AutroMaster V

With its easy set-up and no need for specialized personnel to operate, the AutroMaster V is applicable for protection of most types of buildings and applications, from schools and apartment buildings, to hospitals and mixed developments.

AutroMaster V Certification

This in-person course covers the installation, configuration, commissioning, and operation of an AutroMaster V system.

The certificate will be issued digitally upon completion of the course and is valid for 2 years.
Accreditation: Certificate

Target group: Service engineers, Project engineers

Topics:

AutroMaster 4/ISEMS (available in spring 2026)

AutroMaster ISEMS is Autronica's complete Integrated Safety and Emergency Management System for control and monitoring of alarmed areas, and forms an integrated part of the fire detection system.

AutroMaster 4/ISEMS Operator Training

The fully digital course introduces the system overall and covers the installation and operation of an AutroMaster ISEMS system.

Participants of this course receive a badge of achievement upon completion.

E-Learning   116_AM4_O_D

Accreditation: *Achievement Badge*

Target group: *System operators*

Duration: *ca. 5 hours*

Price per person: 15,000 NOK/1,500 USD
