

AUTRONICA ACADEMY COURSE CATALOG

2026

Zero loss of lives

no injuries or damages caused by fire and gas

General Training Participation Requirements

Before participants start their training, we ask them to acknowledge these [training requirements](#).

For further questions, please see our complete Training Participation Requirements [here](#).

Product Training

AutoSafe

AutoSafe is our high-end fire detection system for large and complex installations.

Operator & Maintenance Training

E-learning 116-AS4-OP-D

This fully digital course is designed to develop the knowledge and skills required for the effective operation and maintenance of AutoSafe 4 systems. It covers essential topics including system architecture, key components, and maintenance principles.

Please note that this course does not provide product certification.

Accreditation: Achievement Badge

Target group: System operators

Topics:

- ***System presentation & system components***
- ***Maintenance: Loop diagnostics tool***
- ***Panel operation, detector replacement***

Duration: 4 hours

Price per person: 12,000 NOK/1,200 USD

Introduction to AutoSafe 4

E-learning 116-AS4-Intro-D

This fully digital course is designed to build knowledge and skills required for the high-level understanding of the AutoSafe 4 systems architecture, ideal for project managers and sales professionals. The course provides an overview of the system layout, components, capacity, and limitations, as well as an overview of system operation and maintenance. *The course does not constitute a product certification.*

Accreditation: Achievement Badge

Target group: Project & Sales Professionals

Topics:

- *System presentation & system components*
- *Panel operation, system maintenance*

Duration: 4 hours

Price per person: 8,500 NOK/850 USD

Installer Training

E-learning 116-AS4-IN-D

This fully digital course teaches you how to effectively and easily install AutoSafe4 system and understand its most commonly used components. Tailor-made for your needs, you can choose the industrial focus within the course.

Accreditation: Achievement Badge

Target group: System installers

Topics:

- *System presentation*
- *Installation*
- *Loop diagnostics tool*

Duration: 4 hours

Price per person: 2,500 NOK/ 250 USD

Certification

The AutoSafe 4 Certification happens in two stages:

- 1) Digital Certification preparation
- 2) In-person Certification course

1) Digital Certification preparation

- ⇒ The fully digital preparation course teaches you how to install and operate an AutoSafe 4 system, as well as how to do minor configuration changes. **Please note: Completion of the digital modules on our e-learning platform BEFORE THE in-person training is MANDATORY. They are a prerequisite to the in-person training. Participants who have not completed the e-learning are subject to be refused access to the in-person training.**

Topics:

- *System presentation*
- *Installation*
- *Loop diagnostics tool*
- *Basic configuration: change detector sensitivity, add/remove loop unit*
- *Panel operation, detector replacement*

2) In-person Certification course

The 2.5 day in-person Certification Course covers Installation, Configuration, Commissioning, and Operation of an AutoSafe 4 System, and Basic Knowledge of Fire Detection Terms and Principles. The certificate will be issued digitally upon completion of the course and is valid for 2 years.

Topics:

- *Commissioning*
- *Configuration: stand-alone system + network system*
- *System operation & maintenance*

Accreditation: Certificate

Target group: Service engineers, Project engineers

Duration of Certification Preparation (e-learning): ca. 4 hours

Duration of in-person Certification: 4 hours digital, 2.5 days in-person

Price per person: 28,000 NOK/2,800 USD

Recertification

Easily re-new your AutoSafe 4 certification via our digital recertification course.

E-learning 116-AS4- R-D-ENG (English); 116-AS4- R-D-NO (Norwegian)

Accreditation: *Certificate*

Target group: *Service engineers, Project engineers*

Topics:

- *AutoGuard detectors*
- *Re-certification exam*

Duration: *1 hour*

Price per person: 6,250 NOK/625 USD

AutoPrime

For small-to-medium sized installations, AutoPrime brings simplicity, quality, and extensive functionality in one integrated system, providing safety and economy in a complete package.

AutoPrime Virtual Certification

This course provides a thorough understanding of the AutoPrime interactive fire detection system. The virtual Instructor-Led course covers the installation, configuration, commissioning, operation and maintenance of an AutoPrime system. In addition, the course covers basics on fire detection terms and principles.

The certificate will be issued digitally upon completion of the course and is valid for 2 years.

Accreditation: *Certificate*

Target group: Service engineers, Project engineers

Topics:

- **System presentation**
- **Installation**
- **Commissioning**
- **Configuration**
- **System operation & maintenance**

Duration: 1.5 day

Hardware:

Purchase of Autoprime training kit is required.

The kit consists of 1 Autoprime panel, 4 loop units and a connection diagram.

The kit is customized to the training exercises.

The kit must be prepared (connected and powered up) prior to the training. The kit must be purchased via your Autronica sales representative. We require 1 kit per 2-3 participants maximum. Allow 3-4 weeks for shipping. If you already have a training kit, make sure to upgrade to AutoGuard detectors.
